```cpp
    return 0;
}

    Ejercicio 3
# Include <iostream>
# Include <string.h>
using namespace std;
bool intervalo (int a, int b, int x)
{
    K (x <= a && x c-b)
    {
        return true
    }
    else
    {
        rerurtn false;
    }
    int main ()
```

```cpp
    }
        return sor;
    }
    int main ()
    {
        char a;
        cout << "ingrese a";
        cin >> a;
        if (caracter Numero (a))
        {
            cout << "Es un digito" << endl;
        }
        else
        {
            cout << "No es un digito" << endl;
        }
        return 0;
    }
```
